

We.J User Documentation

1. Pre-Login Home Page

Users can reach the home page of the We.J application and see the menu options in the navigation bar at the top. The options are to go to the login or the registration pages depending on the users' need. If they already have an account, they can proceed to login. If they need to create an account, they can proceed to register.

2. Registration Page

On the registration page, users are presented with a registration form. Here, they submit information regarding the creation of their account such as an email address, a username that will be displayed to other users, and a password that they will use to log in to the application. Users can register by supplying the account information and clicking the register button. If users accidentally go to the registration page when they already have an account, they can simply click the login button to go to the login page.

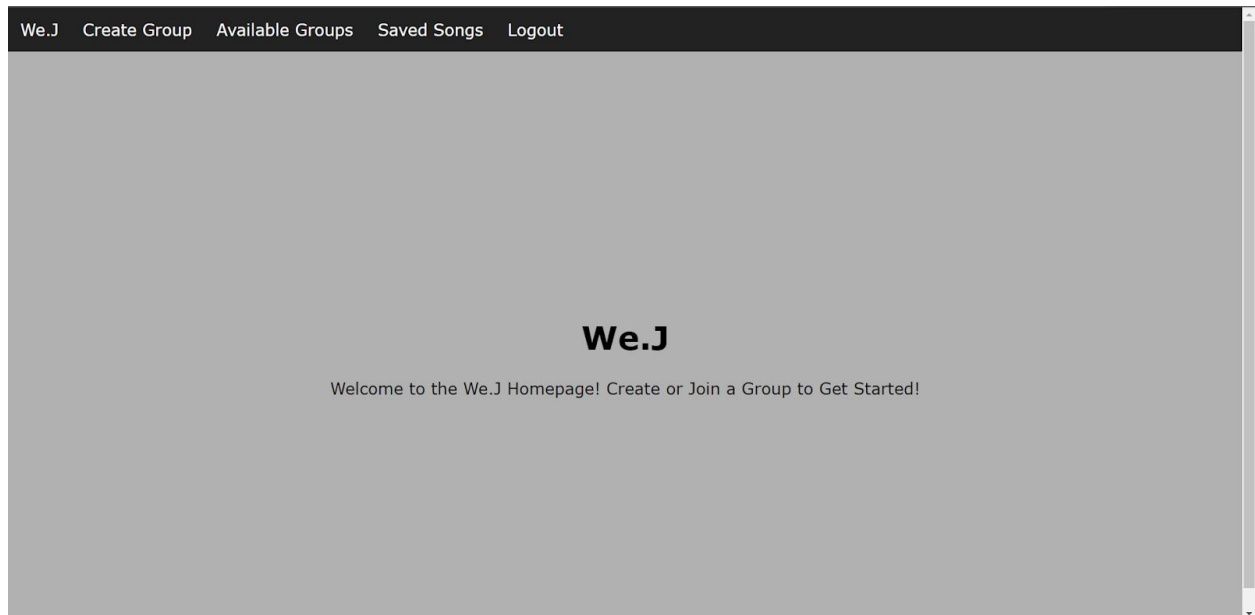

3. Login Page

The image shows a login form on a light gray background. The form is a rounded rectangle containing two input fields and two buttons. The top input field has the text "user1@gmail.com". The bottom input field has a series of dots, indicating a password. Below the input fields are two buttons: "Login" and "Register".

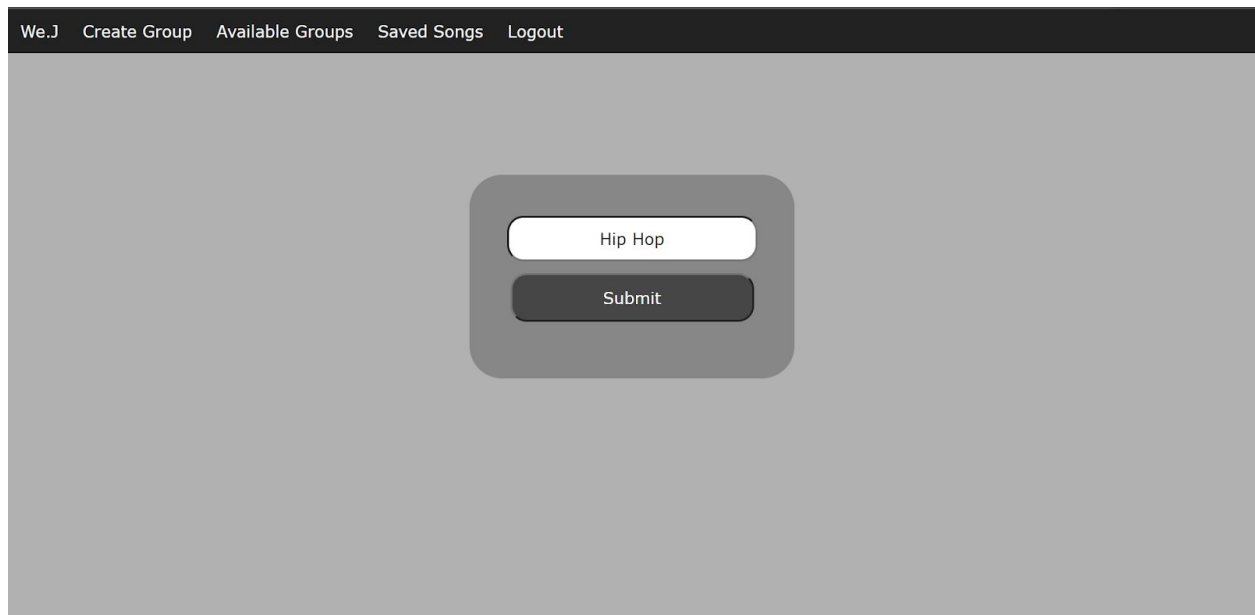

On the login page, users are presented with a login form. Here, they submit the email that they submitted upon creating their account along with the password for the application. Users can login by supplying the necessary information and clicking the login button. If users accidentally go to the login page with no account created, they can click the register button to go to the registration page.

4. Post-Login Home Page

Upon successful registration or login, the user will be able to see additional options in the navigation menu. The user now has the option to create a music group, see other available groups that the user can join, see all of the user's saved songs, or log out of the application.

5. Create Group Page

Users are able to create a group titled by the specific genre or theme they desire. Other users are able to join and play/listen to songs of that topic.

6. Music Group Page (no song)

Rate Group [1 - 5]

Report Problem

Lil Pump - "Gucci Gang" (Official Music Video)
Watch later Share Info

YouTube

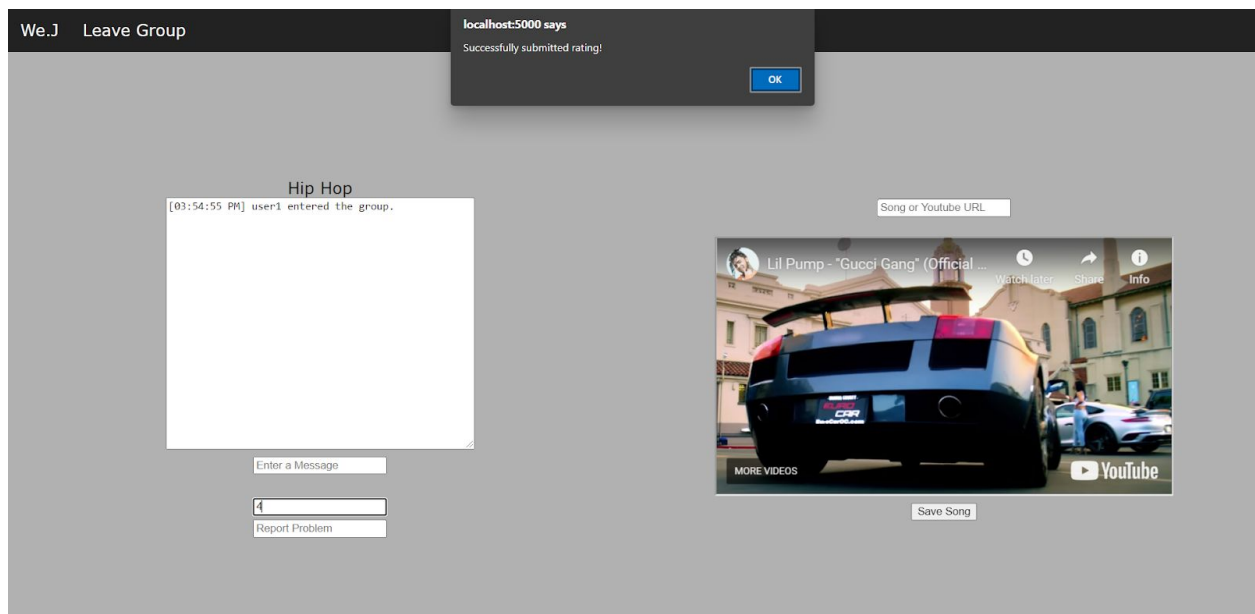

A rotating DJ system allows members within a group to be able to type in the title or youtube url of the song they wish to play.

7. Saving a Song

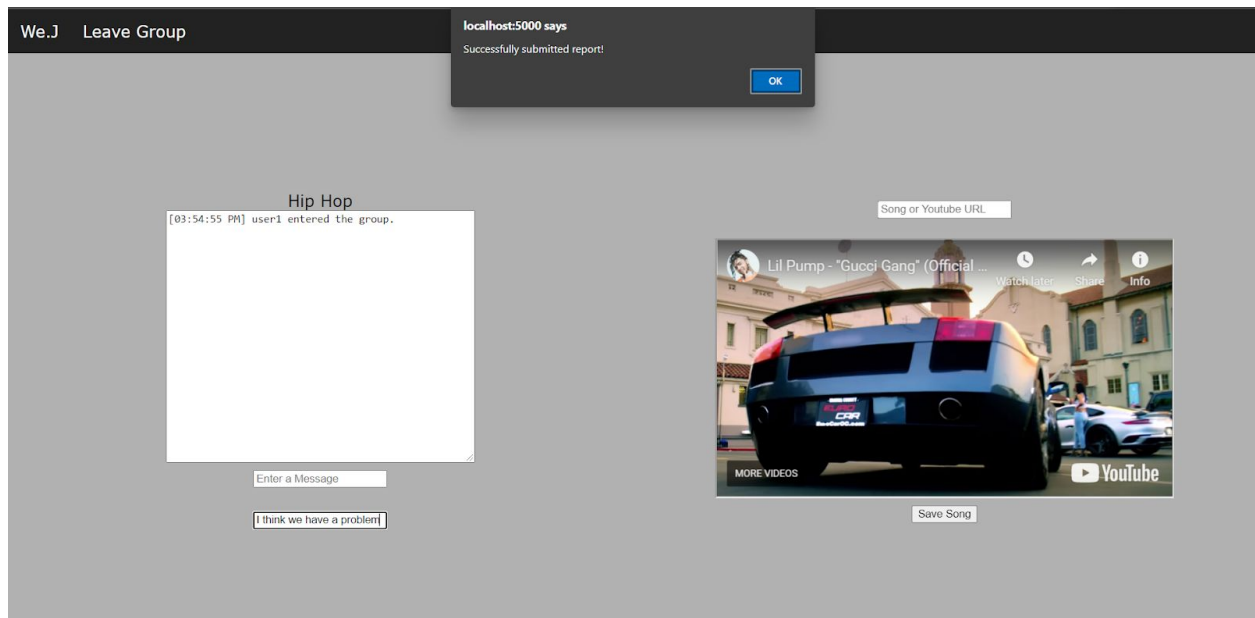

If a user likes a song that is currently being played, they can save it to their own personal “Saved Songs” playlist available on their account.

8. Rating a Group

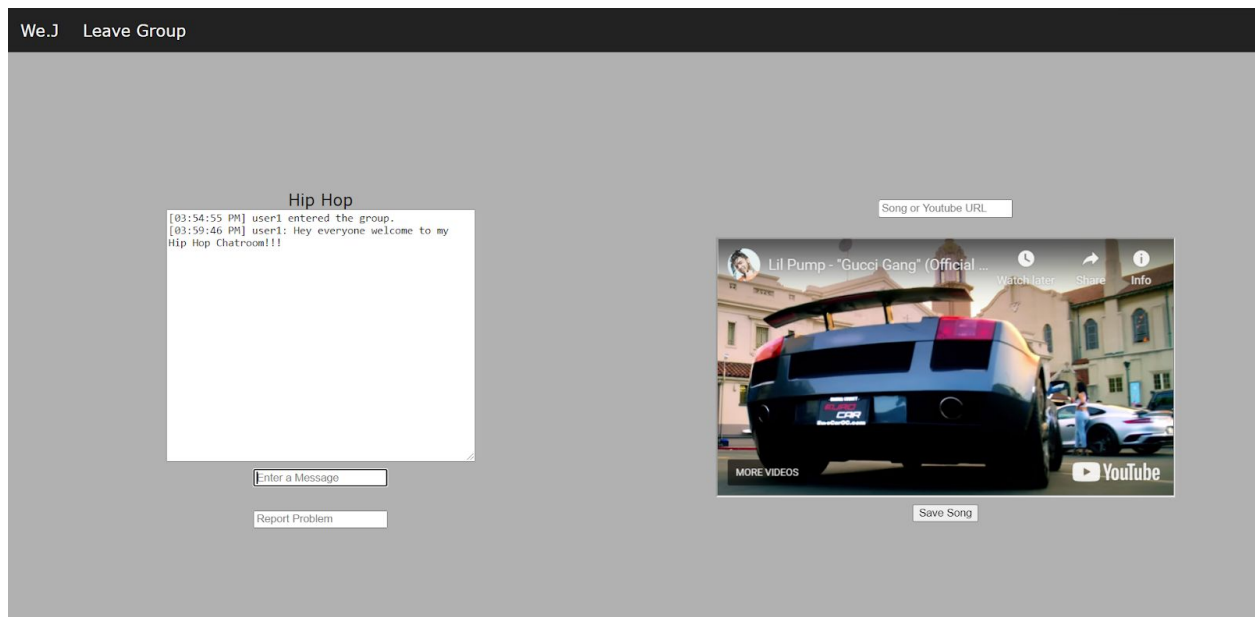

Users can submit a numerical integer rating for the group (1 - 5) describing their opinion of the quality of the group, it’s members, and the songs played. This can be inputted into the “Rate Group” box and can only be submitted once per group.

9. Reporting a Problem

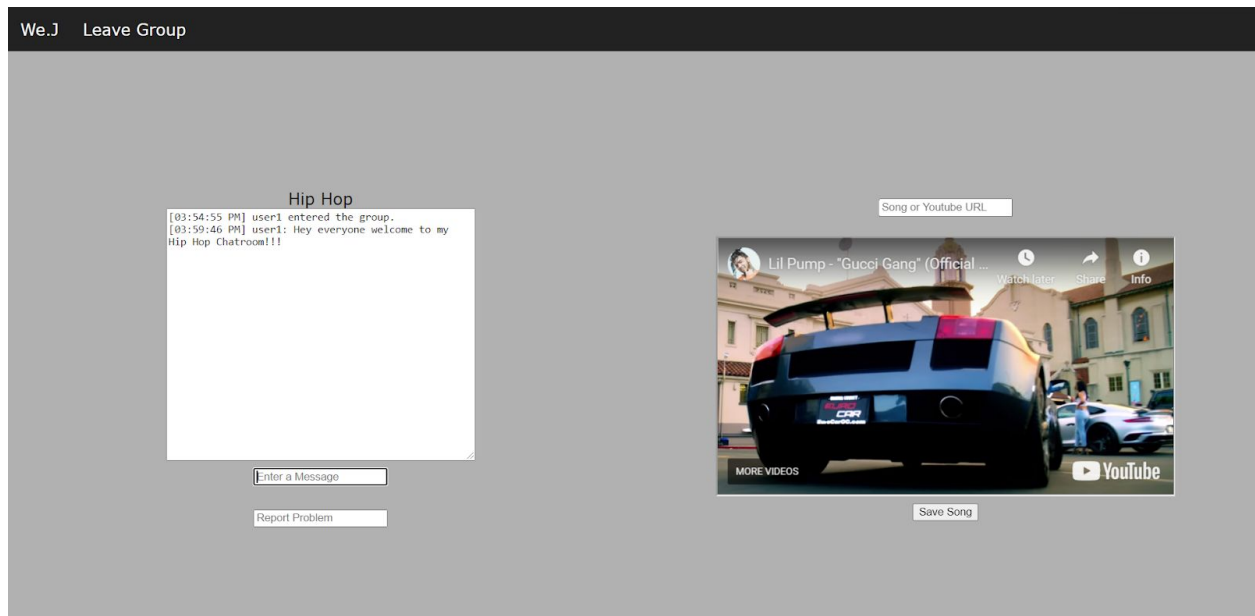

If there are any problems with the application itself or any user is acting inappropriately, users can type their problem into the “Report Problem” input box below the “Rate Group” input box. An email will be sent to the We.J Administrators to respond to your query.

10. Chatting

Users are able to chat to each other within the group which is displayed in the chat box.

11. Leave Group

Once users are finished with the current group and wish to exit, they can press the “Leave Group” button on the upper left-hand side of the screen, and they will be redirected to the We.J Home Page.

12. Available Groups

We.J Create Group Saved Songs Logout		
Group	Host	Join
Country	user2	Join Group

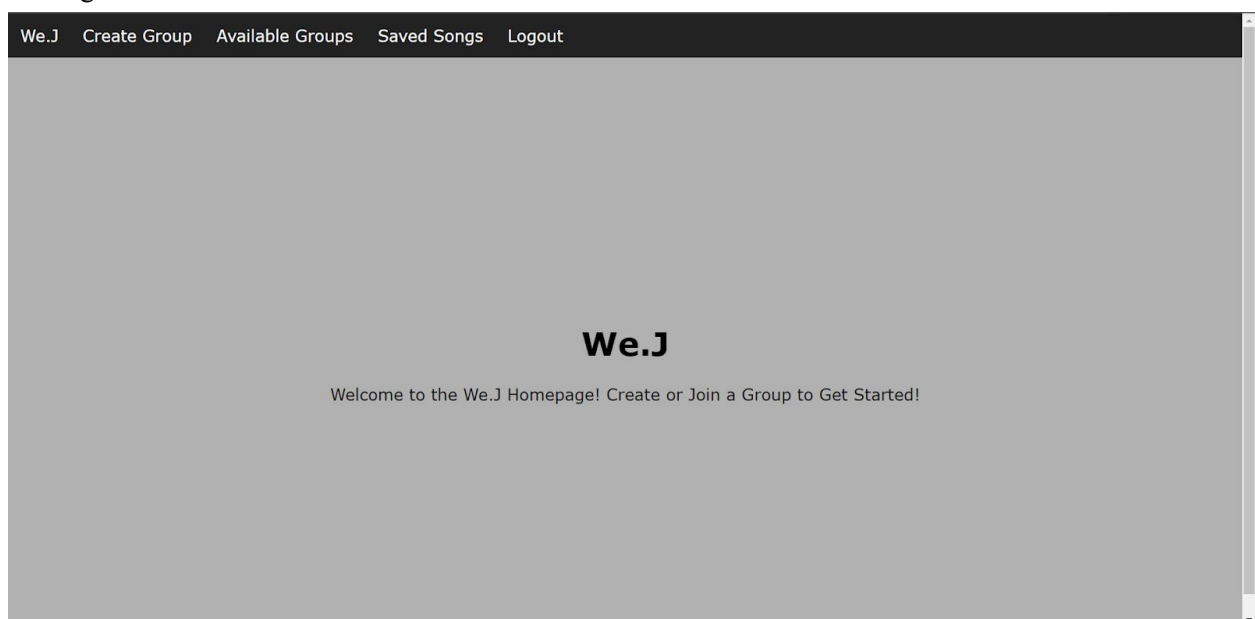

Users can see the list of available groups with their group name and host. They can join any one of the groups they wish by clicking the red join group icon.

13. Saved Songs

Users can view the songs they saved throughout their time on the application and can play the songs directly from the “Saved Songs” page.

14. Logout

Once users are done using the website, they can logout using the logout button at the top of the screen.
